

## Twin benefit

When is a doll more than a gift or plaything? When it's from Batsiranai!

Each of the dolls sold by Traidcraft has a twin in Zimbabwe, where it was made. So when you buy one of these handmade dolls, you keep one and its twin is given to a needy child from a family affected by HIV/AIDS. For many of the children, this is their first doll.

The dolls are made by the Batsiranai Mothers Group, which provides work for around 100 women in poor townships surrounding Harare.

The members are mothers of special needs children, who are often shunned in Zimbabwe, not just by society but also by their extended families.
