

Social accounts

Social accounting is an important way of demonstrating the wider impacts that an organisation has. Traidcraft's social accounts attempt to show both what we are achieving and what our various stakeholders think about the way we work with them.

The 2010-11 social accounts cover the work of our trading company and our charity for 1st April 2010 - 31st March 2011.

You can view the accounts via the link to the left of this page and they are also available as PDF downloads below.
